

SPORTS

CARBON LOSES TO ROSEBUD, 14-5

In a baseball game featuring good fielding by Rosebud and sloppy playing by Carbon the Carbon team went down to defeat by a 14-5 score.

"Babe" Mathers pitched good ball, striking out seventeen, but had no support from the rest of the team. The Rosebud pitcher struck out seven. Scorers for Rosebud were: Costello, 1; Jensen, 2; Wells, 3; Heberling, 3; R. Wilson, 2; Wadler, 2; Burtness, 1.

For Carbon: Nash, 1; Watt, 3; Woods, 1.

Lineups of Teams:

Rosebud: P. Wilson, Costello, Jensen, Wells, McKee, Heberling, R. Wilson, Wadler, Burtness.
Carbon: Treasurer, Mathers, Nash, Woods, Plimm, Lemay, Skerry, McCrady, Watt.
Rosebud: 410 522 336-14
Carbon: 101 001 100-5

CARBON WINS FROM MIDLAND

In a baseball game here on Sunday Carbon defeated Midland in a close game by a score of 5-1. "Babe" Mathers pitched nice ball for Carbon, striking out nineteen men. Carbon scored two runs in the first and three in the third. Midland getting their lone tally in the sixth.

Scorers for Carbon were:

Nash, 1; Watt, 2; Lemay, 1. For Midland: Dady.

Lineup of Teams:

Carbon: Treasurer, Mathers, Nash, Woods, Plimm, Lemay, Skerry, McCrady, Watt.
Midland: Dady, Jones, Hubrook, Helan, Kohout, Smith, Blaskin, Marsh, Whittle.
Carbon: 203 000 000-14
Midland: 000 001 000-5

GOOD MINIMUM PRICE NEEDED

The setting of a fair minimum price for wheat by the Wheat Board is a matter of primary importance to Alberta and Western Canada. The Alberta Wheat Pool invites the co-operation of all organized bodies who are interested in seeing this desired end brought about. It is also important that the Federal Government be impressed with the need for the continuation of the Wheat Board.

The experience of 1935-36 crop

WEDDINGS

EMERY-SKERRY

A quiet wedding was solemnized at 4 o'clock in Christ church on Wednesday, July 15, when Miss Miriam Skerry, youngest daughter of Mr. and Mrs. Joe Skerry of Carbon, was united in marriage to Mr. Frank Emery.

Rev. Selwyn Evans officiated at the ceremony.

The bride entered the church on the arm of her father to the strains of the Wedding march. She looked very prettily in a suit of peach crepe with white accessories and carried a bouquet of white and yellow carnations.

Mrs. Alex Reid, Jr. acted as bridesmaid and wore a white silk dress.

The groom was attended by Mr. R. S. Skerry.

Following the ceremony the guests attended a wedding supper at the home of the bride's parents.

After the supper the guests went to the hall at the Peetres mine and enjoyed a lively dance.

The bride is the youngest daughter of Mr. and Mrs. J. Skerry, old-timers of this district. The groom came to this district from Sturhead in 1928 and has lived here for eight years. The happy young couple will reside in Carbon.

year shows that the setting of a reasonable minimum price provided a measure of protection for the wheat growers that could have been obtained in no other way. The Alberta Wheat Pool contends that the losses, if any, entailed are trivial as compared with the advantages gained by purchasing producing power for the farmers of the west. A drive to bring about lower wheat prices was frustrated by the Wheat Pools in co-operation with the Federal Government last year. While the situation has changed somewhat and prospects appear brighter for improved prices this year, it is suggested that the welfare of agriculture needs the steady influence of a substantial minimum price in order to offset adverse movements which may develop later on.

TAR SANDS PLANT TO OPERATE IN NEAR FUTURE

First unit of a \$100,000 plant for refining gasoline and other products from McMurtry bitumen will be constructed at once and will be in production by mid-August, President R. C. Fitzsimmons, of the International Bitumen Company, announced last week. The announcement follows closely on the heels of a decision of the company—the first commercial producer of McMurtry bitumen—to enlarge the capacity of its separation plant at once.

Operation of the refinery will be in progress in development of the immense beds of bituminous sands in the McMurtry region, sands said to hold oil reserves equal for the entire British Empire.

The company has not solved the baffling problem of separating bitumen commercially as yet.

COUNCIL MEETING

The monthly meeting of the Municipal Council of Carbon was held on Tuesday, July 15. All members of the council were present and Mr. George Weber, vice was in the chair. Letters were received from the Municipal Council on the resolution about the Wheat Board not being continued. All municipal councils are sending this resolution to Ottawa.

All members of the council are asked to visit the bituminous sands as guests of the Union Tractor and Harvester Company to see a demonstration of Diesel tractors.

The appointment of Messrs. McConnell and Mr. Lindner as assessors was approved by the council.

A bylaw, "The Tax Assessment Act for 1935" was passed.

It was agreed to give a grant of one hundred dollars to the Salvation Army for hospital and relief work.

A resolution to the effect that the grasshopper mixing station be kept open on Mondays and Thursdays was also passed.

HESKETH SPARKLETS

Harry Thorburn and family of Rosebud, Grant Thorburn of Prince Albert and Wm. Thorburn of Calgary were visitors at the home of their father, Ross Thorburn. It has been a good many years since they all met together. They are all old-timers of this district.

Mr. Frank Clark and son are holidaying at Pine Lake.

Hello, Francis! How is the radio announcer who keeps his face to the mike.

Bill Walker left on Saturday for Prince. He is on duty on the Vimy trip.

Some of the young studs of Hesketh have left on a fishing trip to parts unknown.

Mrs. D. K. Olsonson and family are enjoying a vacation at Pine Lake.

25,000 COPIES ISSUED OF NEW ALBERTA TOUR BOOKLETS

Making a strong appeal to tourists in its pages which contain a wealth of information and are well and attractively illustrated, a new booklet has just been issued by the publicity bureau of the Alberta Government.

No less than 25,000 copies of this free booklet have been printed for distribution in the United States and Canada and copies are also being sent to the Old Country, France and elsewhere.

Page after page of enthralling scenery, vast amount of data concerning the province and its resources, and general information for the use of visitors makes the booklet something that will be treasured by its recipients.

A key highway map of Alberta maps of bus routes, where to go when and for a delightful canoe trip and a statistical table of facts about this province, form new features of the 1936 booklet.

A striking three-color cover has been provided. One side shows where prairie and mountain meet, the majesty of the Rockies and the soft aspects of the foothills being well blended. On the other side is a picture of the province.

HAIL SWEEPS CARBON AREA

A violent hailstorm swept over the Carbon district last Saturday night, completely destroying the crops in its path. Hailstones the size of baseballs fell for several minutes and with a wind behind them shattered windows all over town. The gardens about town were flattened out but with some of the fruit.

The roofs of several buildings were badly damaged by the hail and the tops of some cars were literally knocked off full of holes by the force of the hail stones.

The strong wind preceded the hail and blew over several telephone poles and disrupted the lights which remained off for some time.

Fences were blown over by the force of the wind and the fire tower was overturned. Part of the fence at the tennis courts was also blown down.

The leaves were knocked off the trees and in some cases branches about an inch thick in diameter were torn off.

The storm covered a wide area, but over eight miles in width and extending from Carbon west to the other side of Drumheller east.

CERTIFICATES NAME WIFE AS THE DOLLAR BILLS

Design for the proposed provincial property bonds has been definitely decided by the government. Premier William Abernethy announced recently. The certificates will be approximately the same size as the Dominion one-dollar bills, and will be issued in one dollar and five dollar denominations.

The size is about six and one-half by two and one-quarter inches. Spaces will be left on the back of the certificates for the affixing of stamps, one for each week of the two year life of the certificates.

The certificates will be lithographed in colors, much along the same lines as the dollar bills, and will be counterfeited proof as far as possible.

The Premier said that the certificates would immediately go into circulation and that they would be about one month in preparation owing to the protection against counterfeiting.

This will mean it will be towards the end of July before the certificates are placed in circulation.

Association cheered about \$15.00 at the sports and dance.

CARBON TAKES FIRST MONEY IN MEN'S SOFTBALL

The Hockley Athletic Association held their annual sports on Wednesday, July 15th, and although only a small attendance was recorded, it was a success. Softball games, foot race, and a horse show tournament were on the program of the day.

In the men's softball, Grand Parks defeated Hockley 32-14 and Carbon defeated Marne 20-5. Munson received a bye. Carbon defeated Munson 17-16. In the final Grand Parks, Carbon emerged victors by a 11-0 score to take the first prize of \$10.00.

In the ladies' softball Munson took first money by 14-0 and Carbon took second money by 19-6 defeat to Hockley.

In the horse show tournament, W. Edwards and Jim White took the prize. Good prizes were given in the children's races and all the races were well-contested.

At night the Munson orchestra provided many music in a large room. At supper time Harry Thorburn and his two daughters, dressed in suits, danced the Highland Flair and were so well applauded they came back for an encore.

The Association cheered about \$15.00 at the sports and dance.

Home Markets For Local Produce

Assuming that a statement appearing recently in the daily press is correct, it seems an anomaly that a country well equipped in many sections to produce wool as Canada should have to import that commodity from other countries.

Yet such appears to be the fact if evidence can be given to the published assertion of L. R. McGregor of Toronto, Assistant Trade Commissioner for Australia to Canada when he said in a recent interview that "Canada is Australia's third best wool country."

Not only are the western provinces well suited to wool production, both on large scale on the ranches in southern areas of Saskatchewan and Alberta and in all three prairie provinces on smaller scale from farm flocks, but it is generally conceded by authorities that conditions in these provinces enable Western Canada to produce wool of equal quality to the best anywhere.

Time was, not more than a decade ago, when a substantial percentage of Western Canadian fleeces were offered to the market in the continent. The quality often was there but many of the fleeces were greasy, filled with burrs and generally speaking ill prepared for market requirements.

Since that time, however, producers have learned a great deal about the preparation of wool, and the standard of the product has been vastly improved, so much so, in fact, that the unskilled fleece in shipments for market from the prairies is a comparative rarity today.

That being the case, it can be asserted with confidence that Western Canada can produce sufficient quality wool for domestic requirements in addition to considerable quantities annually for export, and the country is now complying with market requirements in the preparation of his product.

Why, then, should it be necessary for Canada to import wool from other countries such as Australia and the Argentine? In the light of the facts, that appears an unanswerable question.

Another anomaly in the wool industry is the fact that although Eastern Canadian woolen mills are equipped with machinery to produce tops (wool in a partly manufactured condition) the machines are standing idle while tops are being imported from Great Britain. The reason, it is explained, is because tops are manufactured more cheaply in England than in Canada. This is a plausible explanation, though the situation is an unfortunate one for this country, when it is remembered that there are plenty of idle workmen still in the East.

The anomalous situation at the production end, however, is one which should lead to some inquiries in the hope that the cause for a country like Canada importing wool can be discovered and, if feasible, rectified.

The statement made by the assistant trade commissioner for Australia engenders the thought that possibly there is room for considerable development of the domestic market for other Western Canadian agricultural products and inspires the question whether everything that is possible is being done to ensure absorption of home products in local markets to the greatest possible extent. If other agricultural products are subjected to competition of similar imported commodities, it is a very unfortunate thing for the producers, and especially in this case at a time when farmers are turning to greater diversification because they are forced to it by the European war situation.

Perhaps the solution to the problem of finding wider domestic markets for home grown products lies in the laboratory and this is a question worthy of investigation by farmer organizations, boards of trade and similar institutions and the government.

There are men today working quietly in private laboratories seeking means to extract by-products from wheat and other agricultural products, of which Western Canada has great abundance, capable of conversion into fuels, clothing and other necessities and there is no doubt there is a great opportunity for more research work along these lines.

The work of some of these men leads to the belief that therein may lie at least a partial solution of some of the world's agricultural problems.

It is stated, and not without authority, that the secret of the manufacture of some of these commodities on a commercially feasible basis, has been wrested from test tubes and laboratory experiments by the application of chemical and electrical engineering laboratories, and that all that is needed to make them a marketable reality is the necessary capital. Where this is to be found for such projects is another question.

Thanks To Stamp Collectors

Heavy Purchases Financed Trip Of

Brigable Around World

It was stamp collectors' heavy purchases of Hindenburg commemorative stamps that made the recent flight of the big dirigible to this country possible, Dr. Hugo Eckener told an audience of New York stamp collectors.

The famous designer said that seven flights were paid for only by the help of the stamp collectors to whom they paid the whole expense of the famous trip around the world.

Explorers and pioneers in transportation of all sorts have a source of support in the stamp collectors of the world these days, and the collector welcomes the stamp collector in the expense if it means a commemorative cover, notably marked, for such a thing can never be duplicated, and is likely to increase in value. What a help a few thousand stamp collectors could have been to Columbus! — Port Arthur News-Chronicle.

A water drop cannot rise above the level of the body of water of which it is a part unless the sun's rays draw it up or unless it is driven by mechanical power, as in a spraying fountain.

Cotton and artificial silk material are being made by a process that causes it against wrinkling.

Expert In X-Ray Work

People One Heavy Debt To Skill

Of A Woman

Every war veteran whose life was saved by X-ray location of a bullet in his body, every civilian whose hidden abscess beneath a tooth has been found by X-ray, owe a debt to the skill and devoted efforts of Elizabeth Fleischman Adelson, X-ray woman, who has been called an American Joan of Arc, not a physician but a woman whose X-ray work, through a doctor brother-in-law, has saved a course in electrical science, taught X-ray apparatus and fluoroscopy, rendered valuable aid to the Army during the Spanish-American War, and showed by the excellence of the diagnostic X-ray pictures she took how much X-ray could add to military surgery. After the war she saw the possibilities of X-rays in dental work and was busy with this for the few remaining years of her life. — Quebec Chronicle-Telegraph.

A music-hall magician, open his act by guaranteeing to tell the exact age of any lady in the audience. The remainder of his turn is quite popular, though.

Church is the only place you have to be early to get a back seat.

And the darkest hour is just before the dawn. 2159

Great Change Taking Place

Women Drifting Away From Kitchen Work Survey Shows

The average American woman is drifting further from her traditional place in the kitchen, according to a survey made by Quax, an honorary scientific fraternity for women at the University of Pittsburgh.

The scientific co-eds came to their conclusions while studying problems encountered in a quest of employment. Their detailed survey represented an effort to clarify and classify the many-sided difficulties in working and their relationship with the university graduate.

Interviews, letters and telephone calls to and from a thousand personnel directors of business organizations and public institutions revealed that many positions are waiting for trained women.

Opportunities are available, it was found, in a wide variety of business, educational and scientific spheres. Almost every branch of city, state and federal departments indicated that women entering those trained in science, are needed.

The many possibilities included almost every phase of activity except that centred by the kitchen. The fate of the family's meals, it was indicated, is facing highly uncertain times.

Extension Of Trade

Says Canada Should Co-operate With

The Rest Of The World

Canada's aim should be greater development of trade with Great Britain, Hon. G. H. Ferguson told the Galt Kwanan club.

While advocating extension of trade, the former high commissioner to London said Canada can never follow a policy of isolation. Canada should co-operate with the rest of the world for its betterment and advancement. Britain has the greatest market in the world and the Dominion should capitalize to the fullest extent on this fact, he said.

The speaker predicted the Dominion would soon become a dominant trade nation once again and said the close connection between Canada and Great Britain is the greatest advantage. He paid tribute to the foresight and purpose of the fathers of confederation who were "not dreamers but practical builders."

Drouth Stricken Areas

To Expand Drouth Rehabilitation Work In The West

Under the impetus of extension of drouth-stricken areas in Western Canada, the Dominion government has decided to expand its drouth-rehabilitation work in the west.

Hon. J. G. Gardiner, minister of agriculture, said financial assistance would be given farmers in the digging of "doughs" or reservoirs of water for stock and for irrigation. The basic assistance of doughs is three cents per cubic yard of dirt moved up to a maximum of \$50.

In all cases the government will give engineering advice and all assisted projects must be approved by engineers.

The basic assistance of doughs is three cents per cubic yard of dirt moved up to a maximum of \$50. In all cases the government will give engineering advice and all assisted projects must be approved by engineers.

Assistance on the same basis is provided for the construction of small dams.

Great Difference In Weight

Small And Large Parcels Sent

Recently By Air Freight

Contrast in United States air freight traffic was shown the other day when a parcel weighing only two ounces and another weighing 500 pounds were carried.

The two-ounce package was a single false tooth the owner had left behind in his baggage. The 500-pound package was a machine for washing wirelesing an urgent message to have his forgotten "X-ray" rushed to him. A minute machine crankshaft made up the 500-pound "parcel."

Another strange contrivance was sent by a surgeon in Mexico. It was a tiny piece of living tissue and was pushed to New York for analysis. Laboratory workers carried out their tests and results were telegraphed to the surgeon.

Coronation Plans

Duke Of York Heads Committee In

Charge Of Arrangements

The Duke of York will head the committee in charge of plans for the coronation next May 12, The London Gazette announced.

The committee includes Prime Minister Baldwin, the Archbishop of Canterbury and York, the Earl of Athlone, Sir Samuel Hoare, Lord Lloyd George, Winston Churchill and Sir Austen Chamberlain.

Tragedy In Northern Seas

Russian Scientists Succumb To Cold And Hardships

Twenty-year-old Ian Krushoff related the story of a grim voyage through the wild and icy waters of the White sea with a cargo of 10 dead men.

Krushoff was the lone survivor of a party of 12 all members of a scientific expedition. He reached the shore in a lifeboat loaded with the bodies of 10 of the others. The 11th was not recovered.

The 12, headed by the hydrographer, G. Gardinoff, left the expedition's steamer Toros on June 27 in a small boat to make a study of the depth of the sea between Archangel and Kandalahakha, but on a frost creating the Arctic circle.

"After three days' work," said the youth, "we decided to return to the ship."

"We were caught by a storm. Mountainous waves capized the boat and swept away the cars, equipment and our comrades Nikolai Fedoseyev, whom we never saw again. Struggling in the water, the boat was with great difficulty managed to right the boat and climb in."

Then for a day and a night we were the prey of a furious sea. "We had no cars; we tried frantically to row with our hands. The sea grew rougher, and it was only by trying my right wrist to the oarlock that I was able to stick to the boat."

Ex-King Prajadhipok Has Settled

Down In England

Ex-King Prajadhipok of Siam has just moved into his new home, on which he spent \$100,000 in improvements in Surrey, England. It is a red brick house, standing in 15 acres of gardens, and it has four reception rooms, 12 bedrooms and six bathrooms. Every one of the rooms has been specially designed and furnished.

The interior is in the early Queen Anne style, the drawing room in late Queen Anne. The other rooms are more modern. A motion picture theatre has also been built in which the family entertains visitors. Prajadhipok has the latest picture showing, and favors American gangster pictures.

SELECTED RECIPES

BANANA CAKE

1/2 cup butter

1/2 cup white sugar

2 eggs

4 tablespoons sour milk

1 teaspoon soda

1 1/2 cups Party Flour

2 teaspoons baking powder

1 teaspoon salt

1 teaspoon vanilla

1 cup mashed bananas

Method: 1. Cream butter, add sugar. 2. Add well-beaten eggs. 3. Add bananas and vanilla, beat well. 4. Dissolve soda in milk. 5. Sift flour with baking powder and salt and add, alternate with milk. 6. Bake in loaf tin 50 minutes in moderate oven of 350 degrees.

Emigrant: (Writing back home)

"And all the way across the long train journey was so tiresome that one man kept shouting at every stop 'Bored, Bored, Bored.' We were too—but we didn't say nothing."

Tall men live longer than short men, thin men longer than fat, married men longer than bachelors, and vegetarians longer than carnivorous men, according to statistics.

The word rosary is derived from the Latin rosarium, which was originally a garland of roses and used to crown the image of the Virgin Mary.

House Flies Breed In Garbage

Dangerous Disease Carriers Menace To Public Health

For many years public health efforts have produced the scourge of typhoid fever and many other dangerous, contagious diseases by government enforced legislation in respect to the inspection of cattle, milk-pasteurization, the chemical purification of suspected water supplies, and the elimination of many other known breeding sources of disease. But little has been done recently about the common house fly.

Each summer it infests the land wherever mankind exists. It is borne and bred in the most unsavory and repulsive material, lives on filth and refuse. It carries germs of infectious diseases into the home endangering the health of everyone, from the defenceless baby in its crib to the elders of the house who rely the tasteless salad, upon which a fly may have recently been feasting and spreading disease germs that have accumulated on its legs.

Public spirited citizens should fully realize the seriousness of this menace and take measures to check it. Searching out hidden unsanitary fly breeding places, keeping homes well cleaned, and food covered at all times are important. But the quickest and simplest method of killing all flies is to place a few saucers of Wasp Fly Traps around the house. They will attract the flies and kill them all in a few hours.

The Court Of Claims

Begin Its Sittings After Coronation

After The Coronation date is set,

the strangest Court in the world begins its sittings in London. The Coronation proclamation set up the Court of Claims. It considers pedigree and hereditary rights to serve the King in person.

Some claims which have come before the Court are:

To support the King to the altar.

To carry the Great Spurs (part of the Coronation regalia).

To carry the Cap of Maintenance.

To drink the King's wine as a guard against poisoners.

To have the bed which the King sleeps on the night before he is crowned.

Three claims which are likely to be allowed are these:

The Earl of Shrewsbury, as Lord High Steward of Ireland, to carry a white wand as symbol of his office.

The Baron of the Cinque Ports to hold a canopy over the King's head at the Abbey.

The Lord of the Manor of Work-sop to present to the King a pair of fine gloves.

Plan Crime Hospital

Scheme Is Suggested By Several

Prominent British Physicians

A movement to found a "crime hospital," where criminals may be sent for psychological treatment instead of being imprisoned, has been launched by Lord Dawson of Penn and several other prominent British physicians and psychologists. Officials of the home office are said to be in sympathy with the scheme, which they believe may lead to revolutionary changes in the state's treatment of crime. An appeal for £50,000, with which to build a clinic in London, is being made.

Even if the road or street is not marked with a strip up the centre, there are two imaginary strips on every road and street—the right and the left. On every right or left strip there are one, two or even three lanes. Keep on your own strip and in your own lane is the best advice possible to avoid accident.

Old tramcar bodies, discarded in favor of trolley-buses at various parts of London, can be bought at the depot for 10 sh; carting them away is the real expense.

Celebrate 50th Anniversary

Featured by a congratulatory
telegram from His Majesty
King Edward VIII, and in the
presence of dignitaries of the
state, outstanding members of the
business and social world, rail-
way officials and several thou-
sand citizens, the Canadian Pacific
Railway on Sunday, June 28,
celebrated the 50th anniversary
of the departure of the first
transcontinental passenger train,
from Montreal to the Pacific
Coast. The first passenger train
to cross the continent, entirely
in Canada, left Montreal on June
28, 1886, amid the acclaim of the
entire nation.

The royal message, which was
the highlight of the enthusiastic
anniversary celebration on June
28, was as follows: "I sincerely
thank all those associated with
the Canadian Pacific Railway
Company for their loyal assen-
sance on the occasion of the fif-
tieth Anniversary of the great
Railway which ever since its in-
ception has played so notable a
part in the development of the

Dominion of Canada." Transmitted
to the company in the name
of Sir Edward Beatty, G.B.E.,
K.C., LL.D., chairman and presi-
dent, by His Excellency Lord
Tweedsmuir, the Governor-Gen-
eral of Canada, it served as the
spark to fire the enthusiasm of
the notable assembly of several
thousand at Windsor Station.

The programme, colorful and
impressive, was broadcast on a
coast-to-coast network of the
Canadian Radio Broadcasting
Commission, and was completely
recorded in still and moving pic-
tures. In addition to the mes-
sage from His Majesty and the
military ceremonies, it included a
message from Sir Edward Beatty,
G.B.E., K.C., LL.D., chairman and
president; addresses by D. C.
Coleman, Vice-president of the
company, His Worship Mayor Car-
michael Hume of Montreal, Mrs.
Marguerite Shaugnessy, who is
daughter of the chief architect,
Lord Shaughnessy, P. J. L. En-
och of the Edinburgh Section,
D. D. Brahm of the London

Times and others. Mrs. Camille
Hume, Mayors of Montreal, cut
a birthday cake six feet in diame-
ter and nine feet tall. The Vic-
toria Rifles of Canada, which sup-
plied the Guard of Honor when
the first train for the Pacific
left 50 years ago, again supplied
the Guard of Honor under Col-
onel E. W. Eakin. The band of
the regiment, in addition to its
concert music, played God Save
the King as the Guard presented
arms when the anniversary train
pulled out. The long association
of the Company and the Royal
Canadian Mounted Police was re-
emphasized by Canada's great force.
A detachment of the Mounties
took part in the ceremonies, and
added a touch reminiscent of
prairie and mountain construc-
tion days.

The celebration was continued
at Ottawa and all main-line
points west to Vancouver and
Victoria, came down to the sub-
urban stations to catch a fleeting
glimpse of the decorated anniv-
ersary train.

IMPARTIAL AS LIGHT

YOU cannot argue with light. It just shows
you things as they are. It plays no favorites.
It gives brightness to the things that are
already beautiful and it floods revealingly into
the dark corners to show the dust and the
grime and the hidden ugliness. If you guess
at the nature and quality of things that are
only half seen, if you see things that are not there, your eyes
and your imagination are to blame. You cannot blame the
light. For it can only illumine the aspects that are turned
towards it.

NEWS is like light. It sheds a beam on men and events.
It lifts the darkness from promotions and policies. It pen-
etrates to hidden things and shows the truth as it is, for all
to see.

THE news columns of a good newspaper are impartial. They
tell the truth as it is found, they give all the facts that are
known. The same news that guides its editorial opinions
is there in full to inform your own judgments. It is the
chiefest function of a reputable newspaper to bring every-
thing of importance to the people into the daylight of pub-
licity, discouraging vice and corruption and chicanery.

The independent newspapers of Southern Alberta shed
the light of truth on the happenings and developments
that interest you. Read them, confident in their
integrity.

OVER 50 YEARS OF SERVICE

Southern
Alberta's
Leading
Daily

Two laborers were working on a
very tall block of flats. Suddenly the
man at the top of the ladder called
to his mate at the bottom: "I say,
Jim, come up 'ere a minute and listen!"

His mate slowly climbed the ladder
and at last, quite out of breath, he
reached the top.

"I can't 'ear nothing," he said, af-
ter listening intently for a while.

"No," said the other, "Ain't it
quiet?"

The doctor surveyed his patient with
a critical eye.

You confess that you are bad-tem-
pered eh? I suppose I need not tell
you that science has discovered that
a bad temper is caused by an ugly
little microbe?"

The patient gasped. "Sh!" he ex-

claimed. "For Heaven's sake, speak
quietly, doctor. She's sitting in the
next room."

Victim (leaving barber's chair)—
"Fifty cents! Here, I say, that's a
bit stiff for a shave, especially when
you've cut me five or six times."

Razor-wielding beginner—"Fifty
cents is right sir. Forty cents for
shaving and ten cents for the stick-
ing plaster."

Customer (doubtfully): "Is it a pe-
digree dog?"

Dealer: "Pedigree? Why if this dog
could talk he wouldn't speak to either
of us!"

Criminal (who had got a life senten-
ce): "Oh Judge, I shall never live
to do it."

Kindly Judge: "Never mind, my
man, do as much of it as you can."

"How old are you, madam?" asked

the census taker.

"Just turned 23."

"I understand," he replied, as he
put down 32.

Lawyer (after the case): "The
cross-examination didn't seem to be
of much worry to you. Have you had
any previous experience?"

Client: "Only nine children."

She: "Was my father very violent
when you asked his consent to marry
me?"

He: "Was he? He never worry my
hand off."

A man walked into a pawnbroker's
shop.

"How much for this leather bag?"
he asked.

The pawnbroker studied the bag
closely, and then said, "£1.00."

"I'll take it," said the man. "It
was hanging outside your shop, and the
price was \$5.00."
